DETAILED ACTION

Claim 5 has been cancelled. Therefore, claims 1-4 and 6-14, are currently pending in the instant application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper time wise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 and 6-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,670,486 B1, since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Applicants instant invention in claims 1 teach a process for the racemization of optically active compounds which comprises reaction of compounds of Formula VII or an acid addition salt thereof with an organic or inorganic base at a temperature between 40⁰ C and 60⁰ C.

Determination of the scope and content of the prior art (MPEP §2141.01)

US Patent No. 6,670,486 teach a process for the racemization of optically active compounds of Formula (VII) as defined in claim 1. The process comprises reaction of

Art Unit: 1626

compounds of Formula VII or an acid addition salt thereof with an organic or inorganic base at a temperature between 40⁰ C and 60⁰ C in an organic solvent containing from 12-100% water.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between claim 1 of US Patent No. 6,670,486, and claim 1 of the present application is that claim 1 of the present application is silent of the use of the organic solvent in the reaction. However, claim 4 of the present application teach of the use of organic solvent.

Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)

However, the Courts have decided per In re Boesch, 205 USPQ 215 (1980), that the optimization of variables, such as pH, temperature, solvent, molar ratios, in a known process is prima facie obvious. Therefore, the claimed process would have been suggested to one skilled in the art.
